SADIM FAHAD

CSE Graduate

Bashundhara, Dhaka • +8801306622129 • sadimfahad9@gmail.com
Portfolio: https://shorturl.at/eMJgA

SUMMARY

Mission-oriented individual looking for a job as a junior data scientist to enhance my problem-solving skills and machine knowledge and acquire hands on industry standard experience. Eager to contribute to **data-driven decision-making** by leveraging **strong analytical skills** and a foundation in **Python**, **SQL**, and **machine learning**. Passionate about turning complex datasets into actionable insights to support impactful business solutions.

PROJECTS

Diabetes Prediction Using Machine Learning

- Developed a predictive model using Random Forest to assess diabetes risk based on clinical measurements.
- Achieved 85% accuracy through effective feature selection and hyperparameter tuning.
- Explored and preprocessed data using Pandas and Scikit-learn, addressing class imbalance and missing values.
- Visualized feature importance and model performance using Matplotlib and Seaborn to interpret results clearly.

COVID-19 Hospitalization Dashboard

- Built an interactive dashboard using Tableau to monitor COVID-19 cases, hospitalizations, and hospital bed utilization.
- Implemented real-time data filtering by location and demographics to enhance user insights and data exploration.
- Integrated multiple data sources, including government APIs and CSV datasets, to ensure up-to-date information.
- Designed intuitive visual elements like heatmaps and trend lines to convey critical metrics.

EDUCATION

American international university – Bangladesh **2024**
Dhaka, Bangladesh
Bachelor of Science in Computer Science and Engineering

cantonment public school and college, Momenshahi **2019**
Mymensingh, Bangladesh
Science Discipline

SKILLS

- In depth knowledge of Python and R
- Proficient in scikit-learn and TensorFlow
- Basics of software development
- Fluent on ML and testing concepts

SOFT SKILLS

- Strong communication skills
- Team player
- Adaptive and flexible
- Leadership

CERTIFICATIONS

Google Data Analytics Certificate (Coursera)
- Covers SQL, R, data cleaning, and visualization.

IBM Data Science Professional Certificate (Coursera)
- Includes Python, data analysis, machine learning, and real-world capstone projects.

Deep Learning Specialization by Andrew Ng (Coursera)
- Based on neural networks and deep learning using TensorFlow.

EXTRACURRICULARS

- Member of **AIUB Data Science Club**.
- Participated in **Kaggle competitions**.
